**DETAILED ACTION****EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: claim 7, line 1, "the each" was replaced with --each--.

***Allowable Subject Matter***

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance: U.S. Patent No. 6,332,646 B1 to Tseng discloses a chair assembly having a first support stand 11,12 (Fig. 1), a second support stand 21,22 (Fig. 1), a support frame 4 (Fig. 1), four connecting members (Fig. 3), two first mounting members 41' (Fig. 1), two elastic members 32,33 (Fig. 3), and two second mounting members 41 (Fig. 1) wherein the first support stand has two opposite sides each having a distal end formed with a through hole, the second support stand has two opposite sides each having a distal end formed with a through hole, and the support frame is mounted on the first support stand and the second support stand and has a periphery formed with four insertion holes. U.S. Patent No. 5,454,575 to Del Buono discloses an assembly having a first support stand 18 (Fig. 1), a second support stand 16 (Fig. 1), a support frame 22 (Fig. 1), four connecting

Art Unit: 3636

members 48 (Fig. 2), two first mounting members 58 (Fig. 2), two elastic members 68 (Fig. 4), and two second mounting members (Fig. 2) wherein the first support stand has two opposite sides each having a distal end formed with a through hole, the second support stand has two opposite sides each having a distal end formed with a through hole, the support frame is mounted on the first support stand and the second support stand and has a periphery formed with four insertion holes, each of the two first mounting members is movably mounted on the distal end of a respective one of the two opposite sides of the first support stand and is pivotally connected with a respective one of the four connecting members, and each of the two second mounting members is secured on the distal end of a respective one of the two opposite sides of the second support stand and is pivotally connected with a respective one of the four connecting members. However, the prior art alone or in combination fails to disclose a chair assembly wherein each of the four support tubes is secured in a respective one of the four insertion holes of the support frame and has an inner wall formed with a screw bore, each of the four connecting members is secured on a respective one of the four support tubes and has a first end formed with a threaded rod screwed into the screw bore of a respective one of the four support tubes and a second end formed with a pivot portion formed with a pivot hole, and each of the elastic members is mounted in the distal end of a respective one of the two opposite sides of the first support stand and has an end formed with a positioning snap extending through the through hole of the first support stand and protruded outward from the positioning hole of a respective one of the two first mounting members, as recited in claim 1.

Art Unit: 3636

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following patents are cited to further show the state of the art with respect to chair assemblies:

U.S. Pat. No. 780,007 to Mettler

U.S. Pat. No. 4,577,901 to Phillips

U.S. Pat. No. 4,967,672 to Leather

U.S. Pat. No. 6,062,589 to Cheng
